

# How Can We Be More Flexible With:

Teaching	Time	Materials & Tasks	Groups	Space
Attach key understandings to student interests	Use some time in each unit for relevance	Use interest-based materials	Use interest-alike groups	Devote some space in the room to student inquiry
Share your interests & how key ideas & skills relate to them	Make time for student-generated inquiry (e.g. Orbitals)	Focus RAFTs journal prompts, perf. tasks, etc. on interests	Use student expert-groups	Make space available for student collaboration
Invite students to co-teach on interests	Conclude lessons with "so what" time	Use biography & autobiography	Use Jigsaw groups	Use interest centers or boards

**To Address Interests**
